DETAILED ACTION

1. This Office Action is a response to communications dated 12/12/05. Claims 1-39 are pending in the application.

Allowable Subject Matter

2. Claims 1-39 are allowed.
3. The following is an examiner's statement of reasons for allowance: The invention related to a method and system for content-based routing having, among other features, a novel and unobvious feature of creating a packet cache control block for every fragmented IP datagram to be routed at layer 3 through layer 3 using the content-based information in software, hardware or a combination thereof as disclosed through the application. In doing so would avoid the time and resource consuming reassembly of the IP fragments at the above layer. The novel and unobvious limitation is reflected in the claimed limitation of "*routing any cached fragments and subsequently received fragments of the datagram to the determined destination while the context is active without reassembling the plurality of fragments into the datagram*", structurally and functionally interconnected with other limitations in a manner as recited in claims 1-39.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
